

Where is the vertex?

	Center	inside center	not outside	on circle
How made	2 radii	2 chords	2 tangents	2 secants
Central		2 secants	2 secants	2 chords
Equals the arc		$\frac{1}{2}$ [arc]	1 tangent 1 secant	1 secant 1 tangent
			$\frac{1}{2}$ [arc-arc]	$\frac{1}{2}$ arc

### Circle Theorems – Length

*Congruent chords cut congruent arcs*

Congruent Chord Theorem:

Pull

*Parallel chords cut congruent arcs*

Parallel Chord Theorem:

Pull

$140 = 4x$   
 $35 = x$

*or diameter*  
A radius  $\perp$  to a chord  
will bisect the chord

Radius-chord Theorem:

Pull

$10^2 = 6^2 + x^2$   
 $\sqrt{64} = 4$

$CD = 16$   
 $EB = 4$

Congruent Arc intercept congruent chords. Find x

$$\begin{array}{r} 36 = 2x - 12 \\ 12 \qquad \quad 12 \\ \hline 48 = 2x \\ 24 = x \end{array}$$

Congruent Chords  
intercept congruent arcs  
find x

$$\begin{array}{r} 360 - 114 = \\ \hline 246 \\ \quad 2 \\ \hline 123 \end{array}$$

In  $\odot Y$  the radius is 34,  $AB = 60$ , and  $m\widehat{AC} = 71$ . Find each measure. Round to the nearest hundredth.

$$\begin{array}{l} m\widehat{BC} \quad 71 \\ AD \quad 30 \\ YD \quad 17 \\ \quad 16 \end{array}$$

$$\begin{array}{l} 34^2 = 30^2 + x^2 \\ 256 = x^2 \\ \sqrt{256} = x \end{array}$$

$$\begin{array}{l} m\widehat{AB} \quad 142^\circ \\ BD \quad 30^\circ \\ DC \quad 18^\circ \\ \quad 34 - 16 \end{array}$$

In  $\odot U$ ,  $VW = 20$  and  $YZ = 5x$ . What is  $x$ ?

$$20 = 5x$$

$$4 = x$$

In  $\odot Z$ ,  $\widehat{TR} \cong \widehat{TV}$ ,  $SZ = x + 4$ , and  $UZ = 2x - 1$ . What is  $x$ ?

$$x + 4 = 2x - 1$$

$$5 = x$$

Find  $X$  such that the chords are congruent

$$x^2 + 1 = 3x + 5$$

$$x^2 - 3x - 4 = 0$$

$$(x - 4)(x + 1) = 0$$

$$x = 4, -1$$

Assignment:

flexbook pg 109 1 - 27

3-2-1--

Write down 3 things you learned,  
2 problems you struggle with and  
1 idea to help you improve.
